## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 11 and 13- 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Junkel et al. (6,398,132). Junkel et al. disclose, in fig. 9 B, a dispenser comprising reservoir including a neck 122, a fastener device 120 having an opening; and a fastener including an adhesive 118 to fasten and hold the fastener device to the reservoir neck.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wolter et al. (5,692,650) and further in view of Nain et al. (5,101,993).

Wolter et al. discloses, in fig. 2, a fastener device 12 comprising for fastening a fluid dispenser member substantially as claimed and having a sealing zone,

Art Unit: 3754

except Walter et al. do not disclose the sealing zone including adhesive contacting with the top end-wall of the neck.

Main et al. teach a sealing zone of a fastener device being adhesive coating.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the fastener device of Wolter et al. with a sealing zone contacting with the top end-wall of the neck with a seal comprising adhesive, in view teaching of Nain et al., in order to enhance the permanently bonding sealing between the fastener device and the container.

3. Claims 1, 2, 4-6, and 8-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mascitelli (5,642,908) or Pous et al. (6,186,359) in view of Mavin et al. (2004/94551).

Mascitelli or Pous et al. discloses, a fastener device comprising for fastening a fluid dispenser member substantially as claimed and having a sealing zone, except Mascitelli or Pous et al. do not disclose the sealing zone including adhesive contacting with the top end-wall of the neck.

Mavin et al. teach, in figs. 16 and 17 a sealing zone of a fastener device being adhesive coating.

Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the fastener device of Mascitelli or Pous et al. with a sealing zone contacting with the top end-wall of the neck with a seal comprising adhesive, in view teaching of Mavin et al., in order to enhance the permanently bonding sealing between the fastener device and the container.

## Response to Arguments

4. Applicant's arguments with respect to claims 1-15 have been considered but are most in view of the new ground(s) of rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, KEVIN SHAVER can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
